You can visit your other neighbours (Facebook Friends with the Farm Town app) by clicking on your neighbours tab at the top of your farm screen. This will take you to a list of all your neighbours. If you click on their farm it will take you there directly. You have no way of knowing whether these neighbours are online or not - a good suggestion is to put those neighbours on your buddy list when you see them. When you click on your buddy list in future and scroll down a green light will be activated to the right of their name if they are online at the same time as you. You can also get to their farms from there.
