---

You can now have more than just 8 immediate neighbours. You can accept other people as Facebook Friends and they will be added to your My Neighbours listing. You can change your immediate neighbours by clicking on their pictures in the neighbour slots at the bottom of your farm screen. An option will appear to Change Your Neighbours. You will be redirected to your neighbours listing where you can click on a specific neighbour and choosing the option to Remove someone from Neighbours. It will not delete them from your app but will place them lower in your list and will give you the option to add someone else as an immediate neighbour. You will be able to send and receive gifts from all of these neighbours regardless of whether or not they are one of your immediate neighbours. To add neighbours from your listing onto your neighbour bar, just use the arrows to move across to an empty slot and click on that to add neighbours from your listing. They will receive a neighbour request which they will have to approve. To appear on their neighbour bar, they will need to send you a request too.
