Your neighbours can water your flowers for you and earn 1 coin for each flower when they do so. Watering flowers is on a first-come-first-serve basis. Once a neighbour has watered them, you will not be able to water them as well. You are only able to water your flowers if there are two empty rain drops. When you activate the watering can all flowers will show a blue square around the base. Those that need watering are a light/dull blue and those that have been watered are a darker/brighter blue.
